# **Tejasvi Ravi**

+1 (413) 404-4190

ravitejasvi.com

ravitejasvi@gmail.com

I'm passionate about applying machine learning to build innovative products that have a strong impact on people and our planet. I have experience building prototypes as well as working with large codebases.

**EDUCATION** 

## University of Massachusetts - Amherst, MA

Dec 2018 (Expected)

M.Sc. in Computer Science

→ Courses: Machine Learning, Systems for Data Science, Neural Networks, Computer Vision

### PES Institute of Technology - Bangalore, India

May 2015

B.Tech in Computer Science

**WORK EXPERIENCE** 

## Software Engineer Intern, Microsoft - Redmond, WA

May 2018 - Aug 2018

- → Building a bot, that answers queries regarding builds and their metrics for Office products
- → Won the Machine Learning And Data Science conference 2018 hackathon

## Member of Technical Staff 2, VMware RnD - Bangalore, India

July 2015 - Aug 2017

- → Developed distributed storage management framework that improved availability by 30%.
- → Filed for a *patent*, in the domain of predicting and preventing system failures for vCenter
- Won Best Project Award and Best market potential award at VMware hackathons

## **Student Developer, Google Summer of Code**

Summer 2013 & 2014

→ Implemented user profiles and communication for Tahrir under Freenet project organization

## Co-Founder, TagAlong - Incubated @ MIT Global Startup Labs

Summer 2014

→ Designed and developed ridesharing/ ride-hailing Android application

PROJECTS AND PUBLICATIONS

## Understudy Approach - A Multi-Agent Reinforcement Learning technique

ravitejasvi.com/assets/understudy-approach.pdf

→ Introduced a MARL technique that trains agents to learn co-operative tasks by combining the different learning models; Project for Neural Networks (CS682) course under Dr. Erik Miller

### **Super Resolve Videos using SRGANs**

https://github.com/ravisvi/super-resolution-videos

Extended the state of the art SRGANs technique to super resolve videos for the course Computer Vision (CS670) under Dr. Subranshu Maji

## An Early Risk Detection and Management System for the Cloud with Log Parser - Elsevier 2018 https://doi.org/10.1016/j.compind.2018.01.018

Built a system that used machine learning techniques to provide insights into the fatal operations on a cloud server, and recommend steps to eliminate the risks in real time

## **Quality of Service on Greenplum**

- → Introduced priority groups to queries in GreenPlum database which helped improve the response time by 80% and 10% for high priority users and low priority users respectively
- → Awarded the best capstone project under "Technology impact" (out of 70) in PESIT 2015

TECHNICAL SKILLS

Java, Python, C, JS, SciKit, Hadoop; Machine Learning, Neural Networks, Blockchain, Data Structures

### **EXTRACURRICULARS**

- → CS social committee chair at University of Massachusetts
- → Founded and led Entrepreneurship Club at PESIT; hosted flagship event with 200+ participants; raised \$5000 from Reliance, Github
- Speaker at Women Who Code meetup at VMware on Container Technologies in VMs
